

## News About Your Neighborhood

### **Adelaide & North Road Water Main Improvements City of Fenton**

The Phase 3 North Road water main installation is nearly complete from Adelaide to Oak Park. Beginning Monday June 27, 2011, from 8 A.M. to 12 P.M., the contractor will begin making the water main connection from the old water system to the new water main. During this time the existing water main will be shut down and water service to your home will not be available.

Once the transfer from the old system to the new water main is complete, the contractor will begin to transfer the individual property water services over to the new main. During this time water service will not be available to your home for a couple of hours. The schedule for the individual water service transfers will vary over the next couple of weeks. The contractor will attempt to notify the affected properties the morning that the water service transfer is anticipated to occur for that day.

We know this will be an inconvenience but we do appreciate your patience during this process.

Additional information, including project updates and frequently asked questions, can be obtained from our website: [http://www.hrc-engr.com/Project\\_Sites/Fenton/](http://www.hrc-engr.com/Project_Sites/Fenton/)
